CONFERENCE PAPERS

Distribution and Electrification

- B.Bekker* [South African irradiation and PV array energy output estimation](#)
- E.E. Denny and M.J. Case* [Development of a computer based aid for general use in the design of directly coupled stand-alone solar powered water pumping systems](#)

Electromagnetic Compatibility

- A.S. de Beer* [A systematic approach to designing for electromagnetic compatibility \(EMC\)](#)
- A.S. de Beer* [Understanding the use of SI tools for reducing radiated emissions](#)
- P.H. Pretorius, A.C. Britten, K.R. Hubbard and M.E. Mathebula* [Novel earth electrodes in substations for improved electromagnetic compatibility](#)
- H.C. Reader, R.H. Geschke, J. Badenhorst and E. Laubscher* [Issues in calibrating sensors for EMI and suppression of unwanted modes](#)

High Voltage

- A.S. Dickson, M.D. Grant, I.R. Jandrell and K.J. Nixon* Design of a test facility for the modification of IEC 62305-2 methods in application to structures of limited dimensions
- B.R. Duncan, I. Djurdjevic and T. Govender* Design construction and testing of a 100kV DC generator
- M.D. Grant, A.S. Dickson and K.J. Nixon* An overview of a rocket-triggered lightning platform including specific research objectives
- J.P. Holtzhausen, P.J. Pieterse, C. Wahl and H.J. Vermeulen* A comparison of the AC and DC corona inception levels and modes for various conductors in air
- M.J. Lekganyane, N.M. Ijumba and A.C. Britten* Evaluation of prediction methods for HVDC corona generated audible noise using an indoor corona cage
- M.S. Nabbie and I.R. Jandrell* Preliminary design of a corona cage to study corona performance of HVDC lines at high altitudes
- K. Naidoo, N.M. Ijumba and A.C. Britten* Bird streamer initiated breakdown characteristics of tower air-gaps under HVDC conditions
- Z. Ntshangase, N.M. Ijumba, E. Bussy, A. Naidoo and A.C. Britten* Initial study of fire-induced airgap voltage breakdown characteristics under HVDC conditions
- C. Nyamupangedengu and I.R. Jandrell* Sizing of artificial PD defects for an accelerated aging test of power cable solid dielectric insulation
- R.A. Viljoen and K.J. Nixon* An approach to conducting research and non-conventional testing in a standards testing high voltage laboratory

Machines and Drives

- P.S. Barendse and P. Pillay* A review of inter-turn stator fault detection techniques for doubly-fed wind generators
- D. de Canha, W.A. Cronje, S.J. Hoffe and A. Meyer* Construction of a synchronous generator 2D FEM model
- J.J. Germishuizen, A. Jöckel and M.J. Kamper* Numerical calculation of iron- and pulsation losses on induction machines with open stator slots
- H. Grotstollen and B. Yang* Design of the power supply for the doubly-fed linear motor of RAILCAB test track
- A.J. Rix, M.J. Kamper and R. Wang* Torque ripple and flux density variation due to stator slot opening of a concentrated coil permanent magnet machine

F.G. Rossouw and M.J. Kamper

Operation of direct wind generator system using air-cored axial flux PM technology

V.L. Thomas and R.R. Monageng

Data collector for torque-speed measurements

Mathematical Modelling

D. de Canha, W.A. Cronje, S.J. Hoffe and A. Meyer

Finding the optimal mesh: results from different meshes in Maxwell 2D

Power Electronics

M.D. Britten, I.D. de Vries and J. Tapson

Discrete logic permanent magnet brushless DC motor controller

Power System Analysis

D. Keet and G. Atkinson-Hope

Impact of multiple synchronous motors on an interconnected power network, IEEE 519 Std.

M.A. Kusekwa and R. Tzoneva

Analysis on the algorithms for solution of the weighted least absolute value problem for power system state estimation

Protection, Testing and Measurement

T. Modisane and B.S. Rigby

Performance analysis of the upper south coast distribution network under meshed conditions

N.C. Nagoorsamy and B.S. Rigby

Investigation of high-resistance faults and the weak-end infeed phenomenon in distance protection

DISCUSSION PAPERS

<i>E.A Brink and I.W. Hofsajer</i>	<u>DC bus optimization in integrated power electronics modules</u>
<i>E.A Brink and I.W. Hofsajer</i>	<u>Random interleaved Litz wire for the application in low inductance transformers</u>
<i>C. Brits and I.W. Hofsajer</i>	<u>Condition monitoring and end of service detection of electrolytic capacitors</u>
<i>J.A. Claassens and I.W. Hofsajer</i>	<u>Mechanical design and material selection of a high temperature diode package</u>
<i>F. Cornelius and G. Atkinson-Hope</i>	<u>Tapped harmonic filters to optimize network performance under varying load conditions</u>
<i>G.F. d'Almaine</i>	<u>The suitability of the Agulhas current for offshore power generation</u>
<i>O.R. Dikgale</i>	<u>Comparison of approaches to distribution network planning and design</u>
<i>A.F. Fredericks and I.D. de Vries</i>	<u>A synchronous rectifier with build in electronic braking for use in small wind generators</u>
<i>P.K. Iyambo, R. Tzoneva and G. Fourie</i>	<u>Guidelines for design of overhead distribution lines in the NAMPOWER system</u>
<i>M.S. Jattiem, P. Pillay and K. Folley</i>	<u>An improved algorithm for phase-based voltage dip classification</u>
<i>P.A. Kondjamba</i>	<u>Investigation of the feasibility of supplying Western Cape with high voltage direct current transmission</u>
<i>B. Kotze and G. Atkinson-Hope</i>	<u>Impact of line parameters and harmonic filters on effective operation of a HVDC link</u>
<i>H.M. Langa and M.J. Case</i>	<u>Taking advantage of communication technology in engineering tuition</u>
<i>M.C. Leoaneka and B.S. Rigby</i>	<u>Some challenges associated with distance protection schemes of series compensated protection lines</u>
<i>T.T. Madangombe</i>	<u>Evaluation of the demand side management in the Western Cape</u>
<i>H. Mwasumbi and R. Tzoneva</i>	<u>Overview of interior point methods for the solution of the optimal power flow problem</u>
<i>C.M. Oberholzer and I.W. Hofsajer</i>	<u>A comparison of some of the major techniques for analysis of integrated passive structures</u>

<i>C.M. Oberholzer and I.W. Hofsjer</i>	<u>A FDTD technique for multilayer integrated passive structures</u>
<i>A.S.O. Ogunjuyigbe, A.A Jimoh and D.V Nicolae</i>	<u>Performance enhancement of synchronous reluctance machine by means of split winding and capacitance injection</u>
<i>D.C. Pentz and I.W. Hofsjer</i>	<u>A novel technique for analysis of shaped planar inductor windings in the proximity of an air gap</u>
<i>R. Pillay Carpanen and B.S. Rigby</i>	<u>SSR characteristics of a transmission network with multiple series compensated lines</u>
<i>A. Portolan and I.W. Hofsjer</i>	<u>Experimental investigation of common mode shielding in a high frequency planar transformer</u>
<i>M.F. Ramabulana and I.W. Hofsjer</i>	<u>Applications of a new approach to coupling capacitance</u>
<i>R. Solomon and A.B. Sebitosi</i>	<u>A basic framework for selecting white light emitting diodes for general lighting</u>
<i>R.Tiako and K.A Folly</i>	<u>Comparative performance of power system stabilizer: computer simulation vs. real time digital simulator (RTDS)</u>
<i>D. Visagie and I.W. Hofsjer</i>	<u>A low EMI solution to line fed AC power controllers</u>
<i>R. Zivanovic</i>	<u>An algorithm for arcing-fault location on transmission lines</u>
